

MYFutureJobs Manufacturing Career Day

RAPID MANUFACTURING

6 Jun 2026 (8.30 am – 4.30 p.m)

Rapid Manufacturing Connectivity Sdn Bhd
Zon Industri Fasa 3, Lot 4B,
Jalan Hi-Tech 9, Kulim Hi-tech Park,
09090 Kulim, Kedah

For more information, please visit

www.myfuturejobs.gov.my/careerfair

MYFutureJobs

ATTRACTIVE BENEFITS

- Attendance, Living and Transport Allowance (T&Cs Apply)
 - Quarterly Incentive (T&Cs Apply)
 - 1 Month Cash Incentive Bonus
 - Special Gifts for Festive Seasons & Birthdays
- Attractive Medical & Insurance Coverage (T&Cs Apply)
 - Meal Subsidy, Dental & Optical Benefits

Please bring your Resume, Identity Card, Study Certificate and Payslip (if applicable)

MYFutureJobs Manufacturing Career Day

6 Jun 2026 (8.30 am – 4.30 p.m)

Rapid Manufacturing Connectivity Sdn Bhd
Zon Industri Fasa 3, Lot 4B, Jalan Hi-Tech 9,
Kulim Hi-tech Park, 09090 Kulim, Kedah

LIST OF VACANCIES

RPD MFG CONNECTIVITY SDN BHD

POSITION

QUALIFICATIONS

NPI (FA)
Technician

Experience:

- Previous working experience in a manufacturing environment is preferred.
- Experience in production support for cable and wire harness industry is an added advantage.
- Able to work under pressure and follow up on the assigned NPI builds.

Skills:

- Hands-on experience with assembly process and interpreting technical drawings.
- Ability to collaborate across teams and adapt quickly to shift project timelines.
- Familiarity with standard workmanship such as IPC620 standards, soldering operations and Delicate component rework.
- Ability to enhance the existing work instructions for full scale manufacturability.

Qualifications:

- SKM Level 3 / Diploma in Electrical Engineering, Manufacturing Engineering or relevant field.

The Expeditor
(Engineering)

Experience:

- Previous working experience in a manufacturing environment is preferred.
- Experience in material coordination, production support, warehouse coordination, planning, or expediting is an added advantage.
- Able to work under pressure and follow up on urgent material or production issues.

Skills:

- Strong communication and coordination skills to work with cross-functional teams.
- Good problem-solving skills in material shortage tracking and production flow issues.
- Good follow-up discipline, sense of urgency, and attention to detail.
- Able to communicate production status, delays, and schedule changes clearly.
- Computer literate and able to maintain basic records, tracking updates, and reports as required.

Qualifications:

- Diploma in Engineering, Supply Chain, Logistics, Manufacturing, Business Administration, or relevant field.

Kulim Hi-tech Park, 09090 Kulim, Kedah

LIST OF VACANCIES

RPD MFG CONNECTIVITY SDN BHD

POSITION

QUALIFICATIONS

Process
Assistant
Engineer

Experience:

- 1-3 years of working experience in manufacturing, process engineering, industrial engineering, or a related environment. Fresh graduates with relevant internship or project exposure may also be considered.
- Exposure to cable assembly, wire harness, electronics manufacturing, or assembly operations will be an added advantage.
- Hands-on experience in process study, data collection, rejection analysis, or continuous improvement activities is preferred.

Skills:

- Basic understanding of manufacturing processes, process improvement methods, and root cause analysis tools. Knowledge of DOE, PFMEA, control plans, 7 QC tools, or other problem-solving methodologies is an added advantage. Good analytical, documentation, and data interpretation skills. Proficient in Microsoft Excel, Word, and PowerPoint. Able to communicate effectively and work collaboratively with cross-functional teams. Detail-oriented, hands-on, and willing to work closely with production operations.

Qualifications:

- Diploma or Bachelor's Degree in Manufacturing Engineering, Industrial Engineering, Mechanical Engineering, Mechatronics Engineering, or related field. Basic knowledge of QMS/ISO requirements and manufacturing documentation practices is preferred.
- Knowledge of lean manufacturing, process capability, and continuous improvement concepts will be an added advantage.

Production
Technician

Experience:

- Minimum 1–2 years of experience in wire harness, cable assembly, or electronics manufacturing. Experience supporting operators and troubleshooting production issues. Familiarity with IPC/WHMA-A-620 standards is an advantage. Experience using crimping tools, applicators, testing equipment, and measuring devices. Ability to work flexible shifts when required.
- Basic understanding of production efficiency, quality control, and continuous improvement practices.

Skills:

- Knowledge of wire harness and cable assembly processes. Understanding of crimping, soldering, cable routing, stripping, labeling, and inspection standards. Ability to read and understand drawings, BOMs, work instructions, and wiring diagrams.
- Strong problem-solving and troubleshooting skills. Good communication and interpersonal skills to support operators effectively.
- Leadership and teamwork abilities. Attention to detail and quality-oriented mindset.
- Basic knowledge of manufacturing safety and ESD practices. Ability to work in a fast-paced production environment.

Qualifications:

- Diploma, Technical Certificate, or equivalent qualification in Manufacturing, Electronics, Electrical, or related field.
- Experience in wire harness, cable assembly, or electronics manufacturing. Familiarity with IPC/WHMA-A-620 standards is an advantage. Experience using measuring tools, crimp applicators, testers, and production equipment. Technical certification or relevant manufacturing experience preferred.
